

ISOLATION-MAK Series Isolation Transformer

General Information of Isolation Transformer

- Suitable for Use Worldwide
- The isolating transformers are provided with reinforced isolation
- Increased Isolation between the input and output Windings
- Safe Isolation of Electrical Circuits in Danger Hazardous Areas
- Safety Increased with an Electrically Conductive Environment
- High Efficiency up to 98%
- Special Type of Isolating Transformer with Needed Voltage Values.
- Wide Input Voltage Range
- Step Up & Step Down Possibility
- Short Circuit and Overload Protection Optional
- Easy to Carry and Connect
- Outdoor or Indoor Design
- Power Stabilization
- The Power, Current, Voltage Indicators Optional
- Packaged Isolation and Surge Suppression
- Small Footprint and Easy Connections
- Provides Computer Grade Grounding
- Available till 3000kVA
- Ensures Secure Galvanic Disconnection from Earthing Current
- Industrial Application, Data Centers, Military Usage and Customized
- Power Factor 1.0

Industrial Applications

Outdoor Solutions

Customized Solutions

10kVA Till 3000kVA
